The text explains that an SMS text message from SmartSearch has been sent to the provided phone number and provides instructions on how to complete the steps. A 'Resend SMS' button is present. The technology works best when your document is placed on a well-lit, flat, dark-coloured surface away from direct light which can cause glare. We recommend that you take the photo from directly above the document and not at an angle. Do not obstruct or hold the edges of the documents with your fingers.

Please ensure that the photo is:

- clear
- has no glare or reflections
- all the edges of the document are included

7. Next, you will be taken to a page providing instructions for taking a selfie to verify your identity.

Please ensure you:

- take a live, contemporaneous photo of yourself
- use your front camera
- look directly at the camera with your whole face visible
- remove glasses or hats
- Take against a plain background i.e. wall or door.

8. When you are ready, take a selfie image. As with the document image capture you can also view your selfie and retake if necessary.

9. Confirm you are happy the selfie image is clear.

10. Once you have taken your selfie, you can proceed with your application.
